About Me

I am an Information Systems undergraduate with a strong interest in business analysis, system development, and digital technology. Throughout my academic journey, I have developed analytical thinking, problem-solving, and teamwork skills through various projects.

Projects

Sentiment Analysis on Social Media
Python | NLP | Data Visualization 2026

- Collected and analyzed social media data using Python.
- Performed data preprocessing, feature extraction, and sentiment classification
- Visualized insights to identify public opinion trends..

Inventory Management System 2025
PHP | MySQL | Database

- Designed and developed a web-based inventory management system connected to a MySQL database.
- Implemented CRUD operations to ensure accurate and efficient data management.

Competition

Mathematical Contest in Modeling
Indonesia - USA (Online)

- Represented my institution in an international mathematics competition hosted in the United States.
- Solved complex mathematical modeling problems using analytical and critical thinking.

Student Exchange

Kanda Institute of Foreign Language
Indonesia- Japan (Online)

- Participated in an international online learning program with students from different cultural backgrounds.
- Strengthened communication, critical thinking, and collaboration skills through interactive discussions conducted in English.
